- **CMS** – WordPress
- **Tools** – VS CODE, Git, GitHub, Bash, PS, Figma, AI

PROJECTS

CarToyLand – Fullstack E-commerce website

- Developed a full-stack e-commerce website called CarToyLand, utilizing Node.js and Express.js to build a RESTful Web API following the Clean Architecture principles for scalability, efficiency, and maintainability.
- Integrated JWT for API request authentication and user authorization, ensuring an additional layer of security.
- The website provided functionality for managing user accounts, including adding and deleting products, as well as viewing their own products.
- Utilized React.js, Tailwind CSS, and Firebase for the frontend to create an intuitive user interface.
- The project can be found on [GITHUB LIVE](#)

SocialProfile – A platform to share social links

- Implemented Node.js and Express.js on the backend to create a RESTful Web API, with JWT used for authentication and MongoDB as the database for data storage.
- Utilized React and Tailwind CSS for the frontend to create a user-friendly interface.
- The project allowed users to create accounts and share links to their social media profiles, such as GitHub, Twitter, Facebook, and more.
- The project can be found on [GITHUB LIVE](#)

MusicFrame – Summer camp online school

- Used Node.js and Express.js on the backend to create a RESTful Web API, with JWT used for auth and MongoDB as the database for data storage and payment system with Stripe.
- Dashboard for **Admin, Instructors and Students**.
- Student able to enrol and pay, instructor can sell course
- Designed and developed frontend using React.js and Tailwind CSS.
- Implemented smooth page transitions and interactive animations to enhance user engagement.
- Utilized Tailwind CSS for efficient styling and responsiveness across different screen sizes.
- The project can be found on [GITHUB LIVE](#)
